

Emma Havens Elementary School

School Norm Survey

Description:

To co-develop school expectations with students, staff, and parents, the Emma Havens Elementary team created a survey that ask for input . They used the NJ Social and Emotional Learning Competencies as the structure for each questions and ask students, staff, and parents to share the words or phrases that were most important to them.

To simplify the survey the grouped the competencies into three areas:

- Self Awareness & Self-Management
- Social Awareness & Relationship Building Skills
- Socially Responsible Decision Making

The made the survey available through a Google Form

To find the balance between concrete examples and open-ended responses, the Emma Havens team offered word banks in the form of word clouds.

The survey responses are being used to guide the selection of expectations

Please list 3-5 words that you feel are the most important attributes for social awareness and relationship skills *(Use the word cloud as a reference or use your own)* *
