

Event Recording

Primary Question:

- At what rate (frequency, percentage of opportunities) does something occur?

When to Use:

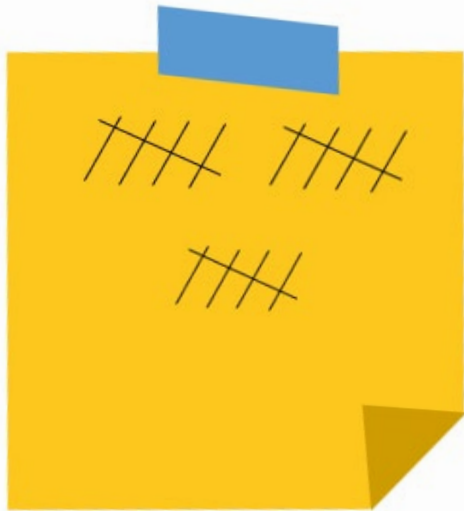

- ✓ Use with contextually appropriate or inappropriate behavior that occurs (or should occur) at moderate to high rates to determine how often, how many times, or what percentage something occurs

Examples:

- ✓ Reduce the number of call outs during class
- ✓ Will raise hand to contribute three times during a discussion

Implementation Resource

- ✓ Requires precision recording
- ✓ Requires an operationalized definition of the behavior being recorded
- ✓ Training on how to document
- ✓ Intermittent reliability calibration (2nd observer check for accurate recording)
